

## SESSION 5:

# CHINA-AFRICA WATER SUMMIT

**Venue: Boardroom 2**

The water crisis is a global problem, which requires worldwide collaboration in order to find solutions. This is especially true for the African countries and China. The objective of this session is to bring top experts together from both countries to discuss strategies to fight the global water crisis. The session is being co-organised by the Chinese Academy of Sciences and the WRC. China has obtained valuable experiences in dealing with water issues over the last 40 years.
